Lautaro Lasorsa

lautarolasorsa@gmail.com •LinkedIn: lautaro-lasorsa •GitHub: LautaroLasorsa

Why should you hire me?

I have a strong foundation in software engineering, data science, and problem solving. I learn new technologies quickly and focus on applying the most appropriate tools and best practices to each project.

Professional Experience

Autoscheduler.AI (Remote)
Machine Learning Engineer July 2025 - October 2026

- Designed and implemented agentic AI workflows with LangChain and LangGraph for a warehouse orchestration platform.
- Built multi-agent components for conversational data retrieval, analysis, natural language interaction with business data and app-creation agentic platform.
- Developed async Python/FastAPI services and integration layers to connect the assistant with SQL Server, Redis, and Cosmos DB.
- Implemented data visualization and reporting features using Plotly and matplotlib for automated analytical outputs.
- Contributed to production quality practices with Docker, Azure DevOps CI/CD, pytest, Ruff, and type checking.
- Developed an agent behavior evaluation suite to assess performance and adaptability in dynamic environments.
- Designed and implemented the relational data base schema, following normalization and best pratices.

Mutt Data (Remote)
Ssr Data Developer February 2025 - June 2025

- Built ETL pipelines in Google BigQuery to process user engagement data at scale and deliver KPI dashboards for CTR, VTR, completion rate, and time viewed.
- Integrated Typesense and TMDB metadata, and used BigQuery table design, CTEs, and window functions to support analytics and search workflows.
- Earned the Databricks Certified Data Engineer Associate certification.

Composable Finance (Remote)
Cryptography Consultant April 2023 - July 2024

- Developed solutions using Zero Knowledge (ZK) over Gnark.
- Implemented the verification of digital signatures over the curve ED-25519 emulating the arithmetic.
- Also developed a solution to optimize transactions using graph algorithms and Python.

Universidad de Buenos Aires (UBA)
Head Class Assistant (JTP) March 2025 - Present

- Led practical sessions on Algorithms and Data Structures and designed midterm exams in a 1 weekly class for 200+ students.
- Open to choose morning or afternoon shifts to accomodate with work schedule.

Universidad Nacional de La Matanza (UNLaM)
Class Assistant March 2020 - Present

- Taught competitive programming to high school (2020-2021) and university students (2022-present) on saturdays using C++, Python, and Kotlin.
- Coached 17 teams that competed in the Argentina Programming Tournament (TAP) between 2022 and 2025.

Competitive Programming and Awards

- ICPC World Finalist (2020: 22nd, 2023: 13th - Bronze Medal, 2024: 17th); Latin America Regional Champion in all three participations.
- IOI participant (2017, 2018, 2019), with a Bronze Medal in 2018 (top 50%).
- Speaker at 4 editions of Training Camp Argentina on *Segment Trees*, *SQRT Decomposition*, *Centroid and Heavy-Light Decomposition*, and *Flow Algorithms*.
- Built a competitive programming toolkit repository with reusable commands and setup utilities.

Education

Universidad de Buenos Aires (UBA)
Data Science Licenciature (Bachelor + Master): 9,09 March 2019 - December 2024
Universidad Nacional de La Matanza (UNLaM)
Computer Engineering (integrated Bachelor + Master): 8.46/10 (in progress, night shift) March 2019 - December 2027 (expected)

Technical Skills

Programming: Python, C++, SQL.
Data and AI: FastAPI, LangChain, LangGraph, BigQuery, Typesense, Plotly, matplotlib.
Infrastructure and Quality: Docker, Azure DevOps CI/CD, Redis, Cosmos DB, pytest, Ruff, static type checking.

Additional Information

Languages: English (EF SET 76/100 C2).
Scientific publications: Since 2021, I have been a member of a research group at UNLaM. We have published 3 papers (1, 2, 3) about AI applied to IoT. Meetings only on saturdays.
